

Hemanth Kumar Pirla

Java Full-Stack Developer | AI Enthusiast

Vijayawada, Andhra Pradesh, India | hemanthkumarpirla8@gmail.com | +91 8712423998 | Portfolio | LinkedIn | GitHub

Professional Summary

Full-Stack Java Developer with strong experience building **scalable web applications**, REST-based backends, and interactive front-end interfaces. Skilled in **Java, Spring Boot, MySQL, WebSockets, and API-driven development**. Additionally, an **AI & LLM Integration Developer** with practical experience designing intelligent systems using **Google Gemini, Python, FastAPI**, and automation pipelines. Demonstrated ability to combine **modern full-stack development** with **AI-enhanced features**, enabling smarter, efficient, and data-driven applications. Passionate about delivering clean architecture, optimized performance, and user-centric solutions.

Education

2023 – 2027 <i>Bachelor of Technology in Computer Science and Engineering (Honors)</i>	KL University, Vijayawada, AP CGPA: 8.77
2021 – 2023 <i>Intermediate (MPC)</i>	Sri Chaitanya, Addanki, AP GPA: 8.8
2020 – 2021 <i>10th (SSC)</i>	ZPHS, Chandhaluru, AP GPA: 8.5

Technical Skills

Programming Languages: Java, Python, JavaScript, C

Web & Backend Development: HTML5, CSS3, Spring Boot, Spring MVC, Hibernate, JDBC, RESTful Services, WebSockets

Databases : MySQL

AI/ML & LLM Integration: Google Gemini API, Prompt Engineering, Data Processing, Automation

Core Concepts: OOP, DSA, API Integration, DBMS

Developer Tools / IDEs: Eclipse, VS Code, Git Bash, GitHub, Postman

Soft Skills: Problem Solving, Collaboration, Communication, Time Management

Experience

AICTE – Google Android Developer Virtual Internship (Cohort 13) *July – September 2025*

- Completed a virtual internship focused on modern **Android development** through structured modules and hands-on tasks.
- Gained practical exposure to **Kotlin**, Android Studio, UI components, navigation flows, and application testing.
- Strengthened understanding of mobile architecture patterns, debugging techniques, and platform best practices.

Projects

Demand Spike Early Warning Agent – AI/ML Project

- Developed an intelligent **AI-driven stock analysis agent** capable of examining daily SKU-level data for rapid demand fluctuations.
- Utilized **Google Gemini LLMs** to interpret CSV-based sales datasets and generate **time-series forecasts** and actionable insights.
- Built an automated Python pipeline that delivers **real-time alerts, summaries, and anomaly detection reports**.
- Demonstrated strong capabilities in data analysis, LLM integration, automation workflows, and AI solution design.

ChatMate – Real-Time Messaging Platform (Java Full-Stack)

- Built a complete **full-stack real-time messaging application** using Spring Boot, WebSockets, JavaScript, and MySQL.
- Implemented **instant, bidirectional communication** using Spring WebSockets to ensure seamless message delivery.
- Integrated the browser-based **Web Speech Recognition API** to enable a voice-to-text input feature, improving accessibility and user convenience.
- Designed secure user authentication, session management, and chat history storage using MySQL.
