

Pirla Hemanth Kumar

Software Engineer Aspirant | Full-Stack Development

hemanthkumarpirla8@gmail.com | +91 8712423998 | LinkedIn | GitHub

Career Objective

Computer Science Engineering student with hands-on experience in Java, Spring Boot, Hibernate, MySQL, REST APIs, and React.js. Experienced in developing full-stack applications, applying Data Structures, Algorithms, and Object-Oriented Programming concepts to build reliable and efficient software solutions.

Education

2023 – 2027 <i>Bachelor of Technology in Computer Science and Engineering (Honors)</i>	KL University, Vijayawada, AP CGPA: 8.73
2021 – 2023 <i>Intermediate (MPC)</i>	Sri Chaitanya, Addanki, AP GPA: 8.8
2020 – 2021 <i>10th (SSC)</i>	ZPHS, Chandhaluru, AP GPA: 8.2

Technical Skills

- **Programming Languages:** Java
- **Web Development:** HTML5, CSS3, React.js
- **Backend Technologies:** Spring Boot, Hibernate, REST APIs
- **Databases:** MySQL
- **Concepts:** OOP, DSA
- **Developer Tools / IDEs:** Eclipse, VS Code

Projects

Secure Fund Transfer System (Java Full-Stack) *Team Project | Role: Backend Developer* [GitHub](#)

Tech Stack: Java | Spring Boot | Hibernate | MySQL | JWT | REST APIs | React.js

- Worked as a Backend Developer in a team project to develop a secure fund transfer application using Spring Boot, Java, MySQL, and REST APIs.
- Developed RESTful APIs for fund transfer, beneficiary management, and account-related operations.
- Implemented JWT authentication, custom exception handling, daily transfer limit validation, and business rule validation to enhance application security.
- Implemented reliable fund transfer processing with automatic rollback on failures, ensuring data consistency and transaction integrity.

ExpenseFlow - Expense Sharing System (Java Full-Stack) *Individual Project* [GitHub](#)

Tech Stack: Java | Spring Boot | Hibernate | MySQL | JWT | REST APIs | React.js

- Designed and developed a scalable expense sharing platform for managing group expenses and optimizing settlement transactions.
- Built responsive frontend interfaces and developed RESTful backend APIs for user authentication, group management, expense tracking, and settlement processing.
- Implemented a debt simplification algorithm to optimize settlement transactions, reducing unnecessary payments and improving transaction efficiency.
- Built CRUD operations for users, groups, expenses, and settlement management using Spring Boot and MySQL.

Soft Skills

Time Management | Team Collaboration | Quick Learner

Achievements

- **Cambridge English Linguaskill** – CEFR B2 English Proficiency [Link](#)
